

The Arizona Border Study

*An Extension of the
Arizona National Human Exposure Assessment Survey (NHEXAS) Study
Sponsored by the Environmental Health Workgroup of the Border XXI Program*

Quality Systems and Implementation Plan for Human Exposure Assessment

The University of Arizona
Tucson, Arizona 85721

Cooperative Agreement CR 824719

Standard Operating Procedure

SOP-UA-D-10.0

Title: Coding: Food Diary Follow Up

Source: The University of Arizona

U.S. Environmental Protection Agency
Office of Research and Development
Human Exposure & Atmospheric Sciences Division
Exposure & Dose Research Branch

Notice: The U.S. Environmental Protection Agency (EPA), through its Office of Research and Development (ORD), partially funded and collaborated in the research described here. This protocol is part of the Quality Systems Implementation Plan (QSIP) that was reviewed by the EPA and approved for use in this demonstration/scoping study. Mention of trade names or commercial products does not constitute endorsement or recommendation by EPA for use.

Coding: Food Diary Follow Up

1.0 Purpose and Applicability

This procedure defines the coding strategy for the Food Diary Follow Up. This questionnaire was developed for use in NHEXAS, the Border Study, and other Health and Environment Projects.

2.0 Definitions

- 2.1 **BORDER STUDY** : An alias for "Total Human Exposure Arizona: A comparison of the border communities and the state" conducted in Arizona by the University of Arizona/Battelle/Illinois Institute of Technology consortium.
- 2.2 **CODE, GLOBAL**: A set of standard codes used in data within the project designating the status of a data field in three cases: datum refused, datum non-applicable, and datum missing.
- 2.3 **HEALTH AND ENVIRONMENT PROJECTS (or H & E)** : An umbrella title for all projects funded to M. D. Lebowitz and/or M. K. O'Rourke (or their designees) which examine purported or real relationships among environmental factors and any aspect of human health.
- 2.4 **HRP SITE**: The **Health Related Professions** building, located at 1435 North Fremont Avenue; Tucson, AZ 85719. This is an annex of the Arizona Prevention Center and the primary site of NHEXAS Arizona.
- 2.5 **NHEXAS Arizona**: Acronym for National **H**uman **EX**posure Assessment Survey, a research project conducted in Arizona by the University of Arizona/Battelle/Illinois Institute of Technology Consortium.

4.0 Discussion

The Food Diary Follow Up is a scanable form. The questionnaire will be completed by the subject in the field, QA checked by the interviewer or technician and office staff and then scanned into the database.

The OMB approved questions were formatted into a scanable form using the Teleform program package and following procedures outlined in SOP # UA-D-30.x. This package has a dictionary feature and a feature that prints out the characteristics of each created form.

The overall coding scheme will follow SOP# UA-D-31.x: Global Coding for Scanned Forms. The data will be stored as flat ASCII files and re-coded according to EPA's coding scheme when it is ready to be submitted to EPA.

A final version of the Food Diary Follow Up form is presented in the attached Appendix A. The Appendix contains the entire form. A description of all fields and variables may be found in UA-D-21.x Appendix B. Field descriptions contain the name of the field on the form, the variable name, the object id attributes, the constraint level for recognition of the code, the length of the field and the type of the field (i.e., hand writing recognition, and automated Dictionary Correction, etc.).

Special Coding lists will be developed as needed to accommodate unanticipated responses. Such coding lists will be attached to each of the appendices as generated.

A summary table of questions needing specific codes and coding lists used are found in Table 1.

5.0 Responsibilities

The Project Data Coordinator is responsible for creating the forms, defining the databases and writing the coding instructions for the Food Diary Follow Up form.

6.0 Materials and Reagents

- 6.1 Codes are to be written with a black felt tip pen only.
- 6.2 Questionnaires are put into a batch once they are coded and recorded on the Batch Description and Custody Record.
- 6.3 Those coding lists that are not in the Coding Lists notebook can be found on line in the /rsc53/TrackNHEXAZ/codes/ directory. The coding lists that pertain to the Food Diary Follow Up Questionnaire are listed in section 8.0 Records, and include Tables 2 through 3. Food codes for the Food Diary Follow Up are located in the "For Office Use Only" box on the Diet Diary adjacent to the three digit handwriting recognition boxes where coding occurs. (See UA-D-43.x Appendix A).

- 6.4 Networked Computer Workstation that can access FoxPro.
- 6.5 Microsoft FoxPro Professional Edition version 2.6, Copyright 1989-1993 Microsoft Corporation.
- 6.6 Coding Program v1.0, developed in-house using FoxPro 2.6.

7.0 Procedural Steps for Coding of the Food Diary Follow Up

7.1 Preparation

- A. Remove a batch of Food Diary Follow Up Questionnaire forms from the Data Coordinator's file cabinets.
- B. Bring forms to an area where coding can be done.
- C. Use only a black felt-tip pen for coding.
- D. Find the Coding Lists notebook which contains the coding list specified in Table 1 and bring it to the coding area.

7.2 Coding Forms

- A. Begin by checking for missing information, illogical answers, and necessary codes throughout the entire form.
- B. Follow the Global Coding scheme (UA-D-31.x) as necessary.
- C. If there is no code appropriate to the given response then create a new code and add it to the coding list according to the procedure found in UA-D-31.x.

7.3 Creation of a New Code

- A. New codes can be added by the Data Coordinator or his or her designee.
- B. See UA-D-31.x for the procedure to create a new code.
