Coding: Arizona Lab Data

1.0 Purpose and Applicability

This procedure defines the coding strategy for the coding of Arizona Lab Data. This questionnaire was developed for use in NHEXAS, the Border Study, and other Health and Environment Projects.

2.0 Definitions

- 2.1 **BORDER STUDY** : An alias for "Total Human Exposure Arizona: A Comparison of the Border Communities and the State" conducted in Arizona by the University of Arizona/Battelle/Illinois Institute of Technology consortium.
- 2.2 **CODE, GLOBAL**: A set of standard codes used in data within the project designating the status of a data field in three cases: datum refused, datum non-applicable, and datum missing.
- 2.3 **HEALTH AND ENVIRONMENT PROJECTS (or H & E)** : An umbrella title for all projects funded to M. D. Lebowitz and/or M. K. O'Rourke (or their designees) which examine purported or real relationships among environmental factors and any aspect of human health.
- 2.4 **HRP SITE**: The **Health Related Professions** building, located at 1435 North Fremont Avenue; Tucson, AZ 85719. This is an annex of the Arizona Prevention Center and the primary site of NHEXAS Arizona.
- 2.5 **NHEXAS Arizona**: Acronym for **National Human EXposure Assessment Survey**, a research project conducted in Arizona by the University of Arizona/Battelle/Illinois Institute of Technology Consortium.

4.0 Discussion

These Laboratory forms are all scanable. They were developed as either primary data forms or secondary "back-up" system forms for data that will be downloaded electronically from specific types of equipment.

The forms were developed using the Teleform program package. This program has a dictionary feature and a feature that prints out the characteristics of each created form.

The overall coding scheme will follow SOP# UA-D-31.x: Global Coding for Scanned Forms. The data will be re-coded according to EPA's coding scheme when it is ready to be submitted to EPA.

The current Laboratory Forms are presented in the attached Figures. A description of all fields and variables may be found in UA-D-24.x Appendix B. Appendix B contains an information sheet defining all abbreviations and a description of each field. Field descriptions contain the name of the field on the form, the variable name, the object id attributes, the constraint level for recognition of the code, the length of the field and the type of the field (i.e., hand writing recognition, and automated Dictionary Correction, etc.).

Special Coding lists will be developed as needed to accommodate unanticipated responses. Such coding lists will be attached to each of the specified appendices as generated.

A summary table of questions needing specific codes and coding lists used are found in Table 1.

5.0 Responsibilities

The Project Data Coordinator is responsible for creating the forms, defining the databases and writing the coding instructions for the Arizona Lab Data form.

6.0 Materials and Reagents

- 6.1 Codes are to be written with a black felt tip pen only.
- 6.2 Questionnaires are put into a batch once they are coded and recorded on the Batch Description and Custody Recorded.
- 6.3 Those coding lists that are not in the Coding Lists notebook can be found on-line in the /rsc53/TrackNHEXAZ/codes/ directory. A copy of each form is listed in section 8.0 Records, and consist of Figures 1 through 3. Food codes for the 24 Hour Food Diary Check are located in the "For Office Use Only" box on the Diet Diary adjacent to the three digit handwriting recognition boxes where coding occurs. (See UA-D-43.x Appendix A).
- 6.4 Networked Computer Workstation that can access FoxPro.
- 6.5 Microsoft FoxPro Professional Edition version 2.6, Copyright 1989-1993 Microsoft Corporation.
- 6.6 Coding Program v1.0, developed in-house using FoxPro 2.6.

7.0 Procedural Coding Steps for Coding of Arizona Lab Data

7.1 Preparation

- A. Remove a batch of Vacuum Dust, Soil Characterization or 24 Hour Food Diary Check Questionnaires forms from the Data Coordinator's office.
- B. Bring forms to an area where coding can be done.
- C. Use only a black felt-tip pen for coding.
- D. Find the Coding Lists notebook which contains the coding list specified in Table 1 and bring it to the coding area.

7.2 Coding Forms

- A. Begin by checking for missing information, illogical answers, and necessary codes throughout the entire form.
- B. Follow the Global Coding scheme (UA-D-31.x) as necessary.
- C. If there is no code appropriate to the given response then create a new code and add it to the coding list according to the procedure found in UA-D-31.x.

7.3 Creation of a New Code

- A. New codes can be added by the Data Coordinator or his or her designee.
- B. See UA-D-31.x for the procedure to create a new code.

8.0 Records

- 8.1 Coding lists are located in the Data Coordinator's office at the Health and Environment project offices.
- 8.2 Data Coordinator must review and approve all new codes.
